Methodology

The survey was sponsored by JSpaceCanada, the New Israel Fund of Canada, and Canadian Friends of Peace Now and administered online by Leger, between November 4 and November 19, 2025. Survey design and analysis by Dr. Dahlia Scheindlin.

The sample for this poll was drawn from a large online panel of Canadian adults. It was weighted by characteristics of the Canadian Jewish population based on the 2021 Census of Canada and the 2018 Survey of Jews in Canada: the distribution of Canadian Jews by age, gender, region of residence, and denominational affiliation. The sample is believed to be broadly representative of Canadian Jewry. A simple probability sample of 502 individuals would have a maximum margin of error of 4.0%, with the margin of error decreasing as findings exceed or subceed 50%. When statistically significant findings are reported here, they are deemed to be accurate within the margin of error in 19 of 20 similar samples. Throughout this report, percentages are rounded to the nearest whole number. Some reported total percentages may not equal exactly 100 due to rounding
